

# DEBBIE AUFDENBERG

Web Developer

## PROFILE

I have worked with webpages on and off for over 20 years. During this time I worked in higher education but my duties included maintaining websites. To move forward in my higher education career, I needed to complete a doctoral degree. Instead of spending time on a doctorate, I decided to begin studying to be a web developer. After taking a few university courses, I was accepted into the Code One Labs program and later began working as a web developer. I now have a little over one year of experience in full-time web development. I look forward to expanding my knowledge and my career.
